

Claim 1 (currently amended):

- 1 1. A tool holder for holding a plurality of tools, comprising:
- 2 a base;
- 3 a plurality of holding-and-mark-retaining members individually mounted on said base, each
- 4 for holding and marking a tool with a specification; and
- 5 a plurality of specification marking members, each for marking the specification of a tool;
- 6 wherein each of said holding-and-mark-retaining members comprising:
- 7 a holding portion for holding a tool;
- 8 a mark-retaining portion for retaining each of said a specification marking member;
- 9 members and
- 10 a retaining means for removably retaining each of said specification marking member
- 11 members in said mark-retaining portion;
- 12 further wherein said holding-and-mark-retaining members are movable relative to each other.

Claim 2 (currently amended):

- 1 2. The tool holder as defined in claim 1, wherein said retaining means in each of said holding-
- 2 and-mark-retaining members comprises a first locating element provided in an upper face
- 3 of said mark-retaining portion and a second locating element provided in an under face of
- 4 said specification marking member.

Claim 3 (previously presented):

- 1 3. The tool holder as defined in claim 2, wherein said first locating element is in the form of a  
2 protrusion, and said second locating element is in the form of a receiving groove.

Claim 4 (previously presented):

- 1 4. The tool holder as defined in claim 2, wherein said second locating element is in the form  
2 of a protrusion and said first locating element is in the form of a receiving groove.

Claim 5 (currently amended):

- 1 5. The tool holder as defined in claim 1, wherein said retaining means contains a sliding means  
2 such that said specification marking member in each of said mark-retaining portions is  
3 slidably received in said mark-retaining portion.

Claim 6 (previously presented):

- 1 6. The tool holder as defined in claim 1, wherein said mark-retaining portion is constructed in  
2 the form of a channel so as to allow said specification marking member to be slidably  
3 received in said mark-retaining portion.

Claim 7 (previously presented):

- 1 7. The tool holder as defined in claim 1, wherein said holding-and-mark-retaining members are  
2 slidably mounted on said base.
